

Area X : Game Prototype

2021 -2022
 Board game
 3D Printed PLA
 Cardboard
 Extracurricular: School Club

Area X: Infiltration is a collaborative dice based strategy game. My friend & I created this for the Georgia TSA state conference. The narrative premise of the game is based around the players being tasked with entering an overrun secret government facility, the aesthetics of the game as such play off of elements of American folklore such as cryptids and the alien conspiracy theories. We designed and prototyped all game elements and packaging.
